

Everpure Exubera & Helia appliance market launch

6 NEW IMPROVEMENTS THE 2011

EXUBERA™

Sparkling & Chilled Water Appliance

HELIA™

Instant Hot & Chilled Water Appliance

1.) Introduction of a service door to reset the Hot water tank. You need to remove only two screws to open it. On the previous model you had to remove 14 screws and remove the entire cover.

2.) We have increased the thickness and rigidity of the metal chassis frame by 30% ensuring wiring, tubing and other internal parts from moving or disconnecting during shipping and installation startup.

3) Red Locking clips for all the John Guest fittings to prevent accidental disconnections.

4.) We have added special locking wire connectors to prevent accidental disconnections.

To allow the electrical disconnection, it's necessary to press the white plastic body with both fingers.

Ice Bank Redesign

5) New for 2011 a squared and more commercial quality Redesigned ICE BANK which increases the capacity from 25 liters/hour to 30 liters/hour, and from 4 to 7 liters in "one go".

2010 Version ICE BANK

Ice Bank Redesign

6) We repositioned the motor agitator inside the ICE BANK. It works properly if it's immersed in water. In the previous round shape ICE BANK, the pump was on the top. If the ICE BANK was not completely filled, the pump was working out of water thus making noise.

The New ICE bank has the advantage to have the motor agitator on the bottom . Therefore even if the ICE BANK is not completely filled, the pump is immersed in water and works without making noise and failure.

7) Because of new larger ICE BANK, the electrical connection box has been moved slightly to the left, to allow the black power cable to go through.

▶▶▶ Product Features / Performance

Features: Exubera

- **Compact dimensions: (16" h x 10" w x 15.25 d)**
- **Delivers 7.9 gallons per hour chilled to 40 degree's**
- **1.85 gallons in one draw**
- **Requires Co2 tank (sold separately)**
- **Power consumption: 350 watt (WG)**
- **Uses ozone friendly R134a**
- **New Part# EV983050**
- **UL Certified**
- **Submitting for AB1953 low lead compliance for CA, VT**

▶▶▶ Product Features / Performance

Features: Helia

- Chills water to 40°F
- Heats water to 200°F
- Delivers 7.9 gals/hr. of chilled water
- Delivers 1.85 gallons in one draw
- Delivers 2.1 gals/hr. of instant hot water
- Ambient water port equipped. Allows to plumb to coffee and ice dispensers
- 870 watts of electricity when compressor is cycling
- Uses ozone friendly R134a
- Dimensions: 16" H x 10" W x 15.25 D
- Part# EV983040
- UL Certified
- Submitting for AB1953 low lead compliance for CA, VT

▶▶▶ Now Available for Sale

▶ Shipping and Ordering

- Cannot be shipped ground transport via a UPS or Fedex service to minimize damage from shipping.
- A minimum of 4 appliances per order required & 8 maximum per pallet - Can mix and Match
