

Helia® Combination Instant Hot/Chilled Water Appliance

Product Specifications

Get luxurious instant chilled and instant hot water at the tap with the all-in-one Everpure® Helia water appliance. The perfect complement to an Everpure commercial grade water filtration system. Ideal for kitchens and wetbars, the Helia is perfect for drinking water, lemonade, frosty cold drinks... plus hot tea, hot chocolate, and quick meals such as oatmeal, pasta, and soups.

The Everpure Helia water appliance features:

- Chills to an ideal temperature of 40°F (4.4°C)
- Heats to an ideal temperature of 200°F (93.3°C), with adjustable temp control
- 7.9 gallons (30 liters) chilled water per hour
- 2.1 gallons (7.95 liters) hot water per hour
- Compact unit is easy to hide in any kitchen cabinet or wet bar
- Hermetically sealed, maintenance-free compressor
- Sealed ice bank cooling system ensures constant availability of chilled water
- Uses ozone-friendly R134a refrigerant
- Consumes only 870 watts of electricity when compressor is cycling
- Stainless steel components
- 3-wire service cord and plug included
- Ambient water port equipped
- Can be plumbed to coffee or ice machine
- UL listed
- Must be used with the Everpure Helia faucet (EV9000-83/87) or three way bar faucet (EV9000-78)

Drinking water faucets shown on back

Combine with a commercial grade Everpure water filtration system

IT'S WATER FILTRATION YOU CAN TRUST

The same commercial quality that makes Everpure the overwhelming choice for water filtration in restaurants is also available for your home. Everpure's exclusive precoat filtration technology combines Micro-Pure and a unique pleated filter membrane to reduce particles as small as 0.5 microns. This highly engineered design offers longer life and consistent performance.

THE PURE SOLUTION

Our products polish water to premium quality so that water is sparkling and free of unwanted tastes and odors. You'll taste the difference in every sip and everything made with water will taste better, too.

THE PRACTICAL SOLUTION

At only pennies per gallon, this system is less expensive per glass than bottled water or other drinking water systems and provides about a year's supply of water, depending on the size of your family and the amount of water you drink.

Specifications

- **Dimensions** – 16H x 10W x 18D in (40.6H x 25.4W x 45.7D cm)
- **Capacity** – 7.9 gallons (30 liters) per hour for chilled water and 2.1 gallons (7.95 liters) per hour for hot water
- **Temperature output** – 40°F (4.4°C) [based on 68°F (20°C) inlet water and 77°F (25°C) ambient]
- **Inlet/outlet** – 1/4" O.D. tubes for inlet and 6 mm O.D. tubes for outlets
- **Power** – 870 watts
- **Motor compressor** – 1/12 HP, 115 VAC, 60Hz single phase
- Adjustable thermostat is factory pre-set
- Install in well-ventilated cabinet

Installation tips

- Install the appliance away from heat sources and direct sunlight
- Minimum requirements for incoming water:
 - Water pressure: 14.5 PSI; 0.5 GPM (Use a booster pump or autoclave to increase water requirements)
- Install a pressure reducer when water pressure exceeds 43.5 PSI
- Do not install the appliance outdoors or in damp locations
- Minimum installation space: 2.5 inches from adjacent surfaces for proper air circulation around appliance
- The appliance generates heat, so external venting may be required when it is installed in a cabinet
- Appliance must be supported on all four foot pads

 This water appliance is approved by Underwriters Laboratories Inc. in accordance with NSF/ANSI 61-2002e.
